

BIOCET

BIOCET is a powerful soil Bio activator for agricultural use. Organic product with Biodynamic carbol bonds to increase nutritional solutions for macro and micro elements assimilation.

Biostrato guarantees the percentage composition, as well as the benefits derived from its application to crops, however, it is not responsible for the damages that may be generated in case of not complying with the recommendations set out in this technical sheet.

- The root is stimulated by generating a constant exchange of particles.
- Promotes the availability of nutrients by increasing their translocation and reducing their leaching.
- Increases available carbon bonds in the soil by electrically attracting ions.
- Decreases the electrical conductivity of nutrient solutions for their proper assimilation in the plant.

COMPOSITION

Organic Carbon	16.5 %
Biochar of Eucalyptus	69 %
Purified Water	14.5 %
Electric Conductivity	3.543 dS/m

DOSE

CROP	LITERS / HA
VEGETABLES	1 a 2
FRUIT TREES	.5 a 1
STRAWBERRY, BLUEBERRY, BLACKBERRY AND RASPBERRY	1 a 2
GRAINS / CEREALS	.5 a 1
ORNAMENTAL	1

PREPARATION METHOD OF THE PRODUCT AND APPLICATION

- Break the guarantee seal and open the package
- Dilute **BIOCET** according to your application and dose per number of plants
- Calibrate the application equipment

INCOMPATIBILITY

None known to date but it is recommended to make previous tests before mixing the product

For prevention, do not mix with agrochemicals
